

This is the YOUTUBE clip I spoke about last night with Bryan Peterson explaining how he uses the **MAGENTA FILTER....**

<http://www.youtube.com/watch?v=OcpwOTSNFI8>

The "Smokey Water" photo that I showed everyone last night I learnt to do by watching two YOUTUBE clips...

Clip one [http://www.youtube.com/watch?v=3\\_dKH2mLt0c](http://www.youtube.com/watch?v=3_dKH2mLt0c)

and

Clip two. <http://www.youtube.com/watch?v=iltp8Ni3uY4>

**ADORAMA TV** was another subject I mentioned last night... the link below takes you to their Youtube site

<http://www.youtube.com/user/adoramaTV/videos?view=0>

You can scroll down on the video links and click on any of them to view some of their photography videos.... There are so many videos on this site... in each video thumbnail you will see a little time in the bottom right hand corner... (eg [9.31] ) this means the video goes for 9 minutes 31 sec . So if you only want to watch the short ones you can pick and choose a video depending on how long you feel like watching one....

ALSO,

At the very base of the Main ADORAMA PAGE which is showing all the thumbnails of the list of videos (,scroll down to the very bottom of the computer screen,) it says "Load More".. Just click on this to see more videos.

When you have finish watching the video just click your BACK arrow button, to take you back to the previous screen on your computer and it should take you back to the main ADORAMA TV screen, where all the video's are....

I hope you all get a chance to watch a few of these video tutorials as they have some great tips...

**AND DONT FORGET** to write down some of the tips you learn **IN YOUR LITTLE BLACK BOOK** so you can reference them next time you go to take a photo in the same situation.....

Regards  
Tracey
